

School of Electronic Engineering and Computer Science

EBU6304 – Software Engineering Group Project

Progress check 2 (15-19 May 2023)

1. Time and room

The group may arrange a time with the teaching assistant during Tutorial time or on Wednesday 17th May afternoon.

The TAs will contact group leaders to confirm the time/room.

2. Preparation

The progress check will focus on the latest working version of the software.

3. The procedure

Please meet your group TA and show the latest version of your software product. The group will be asked questions about implementation, testing, project management, project plan and individual contributions.

4. Checking result

There is NO mark directly for this progress check. However, it will be part of the Project Management marking criteria at the final marking. Groups must show satisfactory progress to date.

The TAs will report any student that:

- Absent from the progress checking
- No contribution or little contribution to the group work so far
